and unforgettable experiences

Tiny House Mobile

is a concept of mobile homes aimed at people, which appreciate minimalist and at the same time diverse a lifestyle characterized by leisure activities away from the hustle and bustle, close to nature.

Slow Life, new trend in the tourism

Concept of the Tiny House mobile houses is part of the more and more popular trend called "slow life." It means life in balance and in harmony with nature. It's caring for your own body and mental health, finding time for your hobbies and relations with the loved ones. Mobile houses provide quiet locations that are far from the city noises. The art of relaxation in a minimalistic style finds a new dimension there. "Slow life" has a positive impact not only on one's health but also their sense of happiness.

Advantages of Owning a Tiny House

- safe choice - as was proven by the pandemics
- location in the great outdoors, far from the city noise
- all-year-round project thanks to the energy-efficient floor heating
- ability to move your office to any place on the planet
- modern, fast, and intelligent solution
- ergonomic project that follows the current trends
- high quality of workmanship - cozy and stylish interior with large quantity of wood, in a Scandinavian style

Ways of using

Mobile houses can be used as cottages for temporary relaxation, residential houses, or offices. They can also be seen as a profitable business. People running tourist centers or planning to establish them are more and more interested in these houses. They can provide a perfect hotel base in accordance with the investor's expectations.

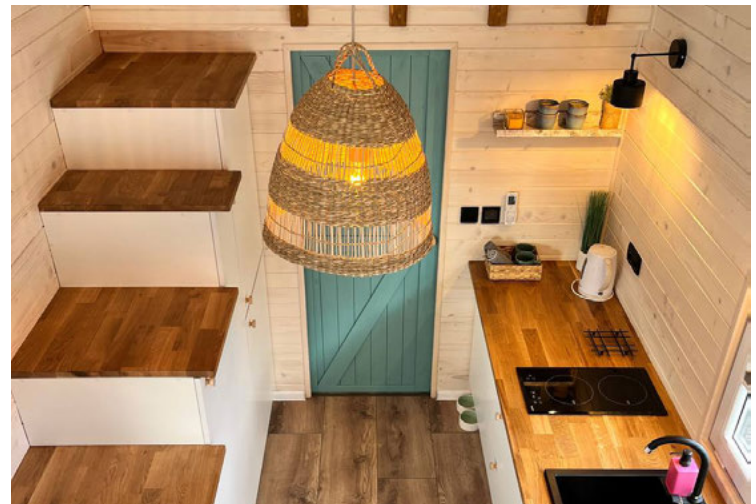

Advantages of Owning a Tiny House

Our past experienced in renting mobile houses has shown us that this is a perfect method for business. We have been highly evaluated by their recipients. As much as 97% of the users considered the functionality and comfort of the houses as "fulfilling all their needs" and 90% declared their willingness to invest in their own mobile house.

Equipment

Tiny House Mobile – is an all-year-round concept of mobile houses equipped with the energy-efficient floor heating and air conditioning, allowing for the comfortable relaxation both in the summer and winter months.
