- ✓ GEP water purification system
- ✓ Efficient wood-burning stove
- ✓ Mounted on a trailer

contact@orianakakebeen.nl

KITCHEN

The kitchen is equipped with a gas hob, gas oven, extractor hood and a stylish, large fridge-freezer. There is plenty of cupboard space, including a tall pull-out pantry cabinet, shown extended above for illustration.

We created a beautiful coffee and juice bar from stunning mahogany, which is also a lovely spot for a quick breakfast or for having a meeting while standing. In winter, it's a wonderfully warm place to sit next to the wood-burning stove. The bar stool can also be lowered right down and moved over to the seating area.

BATHROOM

The bathroom is wonderfully spacious and has a connection for a washing machine. We have added a clothes rail there. The vanity unit provides plenty of storage space, and the Separett Villa 9000 toilet is a real luxury.

MULTIFUNCTIONAL SEETING AREA

The seating area offers plenty of storage space. It is also multifunctional, serving as a corner sofa, dining area, desk and, if desired, a lounge bed.

One section of the seating area can be raised to create a desk. Another section can be raised to serve as a table. It can be adjusted to different heights, rotated and unfolded to create a larger table or an additional platform, allowing the seating area to be converted into a lounge bed.

MEZZANINE 1

MEZZANINE 2

The house is located at Pionierskwartier on a trailer and can be moved to another location using a tractor or heavy-duty vehicle. Read below to find out how the sales and selection process works for both the house and the site.

‘HET PIONIERSKWARTIER’

The tiny house has been located since August 2024 in the community ‘Het Pionierskwartier’ a cooperative in Delft. The cooperative has the land on loan from the Municipality of Delft to facilitate the placement of Tiny Houses. Since July 2019, the zoning plan has allowed Tiny Houses for a period of 10 years. Currently, there are 14 tiny houses, and residents share various facilities, including worm composting, communal indoor and outdoor spaces, a laundry room and emergency facilities. Everyone contributes to the community in different ways, for at least 8 hours per month. The cooperative also requires a monthly financial contribution.

What does this mean in practical terms for the purchase?

This means that the tiny house is currently located at a site with a residential address where you can register. However, the cooperative leases the land from the municipality, and purchasing the tiny house does not guarantee membership of the cooperative or the right to use the site where the house is currently located. In order to live at Pionierskwartier, new residents must go through a selection process. If a prospective resident is selected, they will become part of Pionierskwartier and the house can remain in its current location. Of course, it is also possible to buy the Tiny House and move it to another location. Please state this clearly in your response if this is what you intend to do. See “Sales and Selection Process” for details of all the steps.

For more information about the community: <https://www.pionierskwartierdelft.nl>

THE SALES AND SELECTION PROCESS

THE STEPS

1. If you are interested in buying this tiny house, we would be pleased to hear from you before 11 October 2026. Please send us a letter:

- One or two pages explaining who you are (or who you are as a group) and why you want to live tiny. And, if you would like to live in Pionierskwartier: why do you want to live in our community and what would you like to contribute? You can be creative, like make a video instead.
- A statement confirming that you can meet the asking price. Later in the process, we may ask for supporting documents. We will handle these confidentially and delete the documents after the sale of the house.

2. Based on the submitted letters and financial situation, we will select potential buyers/residents who will be invited to come and view the house. This is by appointment only.

3. If, after the viewing, you make your offer final and indicate that you would like to become a resident of Pionierskwartier*, a further selection procedure will follow. For this, three potential buyers will be put forward for an introduction with the residents. This is currently planned for the end of October.

4. Confirmation of whether you have been selected as a new resident: the timeline depends on how the selection process progresses.

5. This will be followed by a signing appointment for the transfer, a deposit, and the Pionierskwartier membership documents. The handover of the keys will take place on a date to be determined.

***Of course, it is also possible to buy the tiny house and move it to another location. Please state this clearly in your response if this is what you intend to do.**
